

UNIT 1 – PUTTING IT ALL TOGETHER

HTML Layout - Using Tables

One very common practice with HTML, is to use HTML tables to format the layout of an HTML page.

A part of this page is formatted with two columns.

As you can see on this page, there is a left column and a right column.

This text is displayed in the left column.

An HTML `<table>` is used to divide a part of this Web page into two columns.

The trick is to use a table without borders, and maybe a little extra cell-padding.

No matter how much text you add to this page, it will stay inside its column borders.

The next page is dedicated to putting all the knowledge you gained from Unit 1 into practical use.

Try It Out!

Let's put everything you've learned together to create a simple page. Open your text editor and type the following text:

```
<html>
<head>
<title>My First Web Page </title>
</head>
<body>
<table width="90%" cellpadding="5" cellspacing="0" >
  <tr bgcolor="#EDDD9E">
    <td width="200" valign="top"></td>
    <td valign="top"><h1 align="right">Janet Doeson</h1>
    <h3 align="right">Technical Specialist</h3></td>
  </tr>
  <tr>
    <td width="200">
      <h3>Menu</h3>
      <ul>
        <li><a href="home.html">Home</a></li>
        <li><a href="faq.html">FAQ</a></li>
        <li><a href="contact.html">Contact</a></li>
        <li><a href="http://www.austincc.edu">Links</a> </li>
      </ul></td>
    <td valign="top"><h2 align="center">Welcome!</h2>
    <p>Welcome to my first webpage. I created this webpage without the
assistance of a webpage editor. Just my little text editor and a keen
understanding of html.</p>
    <p>Look around. Notice I'm able to use paragraphs, lists and headings.
You may not be able to tell, but the layout is done with a table. I'm very
clever. </p>
    <blockquote>
      <p>I always wanted to be somebody, but now I realize I should have
been more specific.</p>
      <cite>Lily Tomlin </cite> </blockquote>
    </td>
  </tr>
</table>
<hr width="90%" align="left">
<address>
  Janet Doeson<br>
  Technical Specialist<br>
  512.555.5555
</address>
<p>Contact me at <a href="mailto:jdoeson@acme.com">jdoeson@acme.com</a>
</p>
</body>
</html>
```

Save your page as **mytable.html** and view it in your browser.
